Maksym Synenko

Senior Full-Stack / Backend Engineer · TypeScript · AI agents & LLM

Senior full-stack engineer with **8 years in production**, the last six building the core platforms of Bonliva, a Swedish healthcare staffing group. I own features end to end — schema, API, background workflow, UI and deploy — and lately the AI layer on top: **LLM-based AI agents and MCP servers** built into the product.

Experience

Dec 2020 – now
Gdańsk, Poland

Senior Full-Stack Engineer, Efisco

Bonliva healthcare staffing platform: ERP, CRM, consultant portal and mobile app

Bonliva ERP · NestJS, Next.js, PostgreSQL, Hatchet

- Core contributor to a greenfield ERP: Turborepo monorepo, NestJS API, Next.js app, Hatchet worker, 27 packages.
- Designed the API-first backend: one **OpenAPI** spec feeds the web app, MCP server and integrations; a generated TypeScript client catches breaking changes in CI.
- Extended the **MCP server** in the NestJS API to **~120 tools** (JWT, Streamable HTTP); tenant-scoped pgvector semantic search, contract tests.
- Modelled PostgreSQL schemas with TypeORM and Kysely; event-driven Hatchet workflows with an outbox for SMS/email, hardened against Postgres restarts and slow queries.
- Accommodations (bookings, taxation), Bemlo vacancy intake, booking export and CRM/Bemlo time-sheet sync.

Bonliva CRM, portal and mobile app · GraphQL, MongoDB, .NET, React Native

- GraphQL and REST APIs over MongoDB and MikroORM; C# / .NET time report service; ERP↔CRM sync via Service Bus and Temporal with an inbox pattern.
- Next.js consultant portal with BankID sign-in; React Native app used by **~1,000 healthcare consultants**.

AI tooling · Claude, OpenAI, DeepSeek, MCP

- Build AI agents and MCP integrations; write and tune prompts for Claude, OpenAI and DeepSeek models.

2018 – 2020
Kharkiv, Ukraine

Freelance Front-End Developer

Jun – Dec 2020, remote

Built React web apps for small business clients end to end: scoping, estimates and delivery.

Front-End Developer, CRISPERSOFT

Oct 2018 – Jun 2020

React/Redux SPAs for real estate, social and digital-asset products; Material UI design system; mentored juniors.

Front-End Developer, Mobilsoft

Aug – Oct 2018

Shipped JavaScript UI features and fixed front-end bugs in a production web app.

Open source

zerograph · github.com/devmaxxx/zerograph
Rust knowledge graph of a repo's code and docs (15+ languages), served to AI agents over MCP; built and refreshed without model tokens.

React libraries · github.com/devmaxxx
react-html5-parser · react-native-next-wheel-picker · react-clear-browser-cache

AI-agent security · shell-secrets (npm), shell-guards, pii-allowlist
Zero-dependency guards for AI-agent tool calls: secrets and risky shell commands.

Skills

Programming	TypeScript, JavaScript, C#, SQL
Backend	Node.js, NestJS, GraphQL, REST, OpenAPI, ASP.NET Core, event-driven architecture, payments (Stripe)
Front-End, mobile	React, Next.js, React Native, Expo, Redux, MobX, Material UI, Tailwind CSS, Firebase
Data, workflows	PostgreSQL (pgvector), MongoDB, Redis, TypeORM, Kysely, MikroORM; Temporal, Hatchet, Azure Service Bus
AI, LLM	AI agents, LLM, Model Context Protocol (MCP) servers, prompt engineering, embeddings, semantic search, RAG, Claude Code, Claude / OpenAI / DeepSeek APIs
Cloud, DevOps	Azure, Azure Container Apps, Bicep, Ansible, Docker, GitHub Actions, fastlane, CI/CD; OpenTelemetry, Sentry, Grafana
Testing, tooling	Jest, Vitest, Playwright, e2e testing, Turborepo
Spoken	Ukrainian (native), Russian (C2), English (B2), Polish (A2)

Education

2012 – 2018 — **MSc (2018) and BSc (2016), Computer Science** · National Aerospace University “Kharkiv Aviation Institute”, Ukraine
