Maksym Synenko

Senior Full-Stack Engineer · Node.js · React · React Native · AI agents & MCP

Senior full-stack engineer with **8 years in production**, the last six building the core platforms of Bonliva, a Swedish healthcare staffing group. I own features end to end — schema, API, background workflow, UI and deploy — and lately the AI layer on top: **LLM-based AI agents and MCP servers** built into the product. English daily with the Swedish team.

Experience

Dec 2020 – now
Gdańsk, Poland

Senior Full-Stack Engineer, Efisco

Bonliva healthcare staffing platform: ERP, CRM, consultant portal and mobile app

Bonliva ERP · NestJS, Next.js, PostgreSQL, Hatchet

- Core contributor to a greenfield ERP running Bonliva's staffing operations: NestJS API, Next.js app, 27 packages.
- Designed the API-first backend: one **OpenAPI** spec feeds the web app, MCP server and integrations; a generated TypeScript client catches breaking changes in CI.
- Extended the **MCP server** to **~120 tools** (JWT, pgvector search), so managers use ERP data through AI agents.
- Modelled and migrated PostgreSQL schemas with TypeORM; event-driven Hatchet workflows with an outbox for SMS/email, hardened against Postgres restarts and slow queries.
- Bookings and accommodation taxation, vacancy intake from a staffing marketplace, automated time-sheet sync.

Bonliva CRM, portal and mobile app · GraphQL, MongoDB, .NET, React Native

- GraphQL/REST APIs over MongoDB; C# / .NET time reports; ERP↔CRM sync via Service Bus and Temporal.
- Next.js consultant portal with BankID sign-in; React Native app used by **~1,000 healthcare consultants**: **~99% crash-free, 4.7 rating** (App Store, Google Play).

Team and AI tooling · Claude, OpenAI, DeepSeek, MCP

- Code review in a team of 4; plan technical solutions with the Swedish product team.
- Build AI agents, agent workflows, Claude Code skills and commands, MCP integrations; prompts for LLMs.

2018 – 2020
Kharkiv, Ukraine

Freelance Front-End Developer

Jun – Dec 2020, remote

Built React web apps for small business clients end to end: scoping, estimates and delivery.

Front-End Developer, CRISPERSOFT

Oct 2018 – Jun 2020

React/Redux SPAs for real-estate and digital-asset products; Material UI design system; mentored juniors.

Front-End Developer, Mobilsoft

Aug – Oct 2018

JavaScript UI features and bug fixes in a production web app.

Open source

zerograph · github.com/devmaxxx/zerograph
Rust knowledge graph of a repo's code and docs (15+ languages), served to AI agents over MCP; built and refreshed without model tokens.

React libraries · github.com/devmaxxx
react-html5-parser · react-native-next-wheel-picker · react-clear-browser-cache

shell-secrets · npm · github.com/devmaxxx/shell-secrets
Zero-dependency guard that stops secrets in shell commands and AI-agent tool calls (Claude Code, Codex).

Skills

Programming	TypeScript, JavaScript, C#, SQL
Backend	Node.js, NestJS, GraphQL, REST, OpenAPI, ASP.NET Core, event-driven architecture, payments (Stripe)
Front-End, mobile	React, Next.js, React Native, Expo, Redux, MobX, Material UI, Tailwind CSS, Firebase
Data, workflows	PostgreSQL (pgvector), MongoDB, Redis, TypeORM, MikroORM; Temporal, Hatchet, Azure Service Bus
AI, LLM	AI agents, agent workflows, LLM, Model Context Protocol (MCP) servers, prompt engineering, embeddings, semantic search, RAG, Claude Code (skills, commands), Claude / OpenAI / DeepSeek APIs
Cloud, DevOps	Azure (Container Apps, Bicep), AWS, Cloudflare, Ansible, Docker, GitHub Actions, fastlane, CI/CD, Turborepo
Testing, tooling	Jest, Vitest, Playwright, React Native Testing Library, Detox, Maestro, e2e testing; OpenTelemetry, Sentry, Grafana
Spoken	Ukrainian (native), Russian (C2), English (B2), Polish (A2)

Education

2012 – 2018 — **MSc (2018) and BSc (2016), Computer Science** · National Aerospace University “Kharkiv Aviation Institute”, Ukraine
